Boston Daytime — ETA evaluation
Mean absolute error
Seconds (lower is better)
Stops ahead
n=215
n=179
n=151
n=128
Mean signed error
Seconds (+ later prediction, − earlier)
Stops ahead
Checkpoint coverage
Checkpoint / target pairs
Stops ahead
Evaluated
No target arrival
No usable prediction
Ambiguous prediction
Errors use GPS-estimated arrivals; preliminary results. n = evaluated pairs, not independent trips.
